Audit Cloud

medida

Intelligent technology for on-site companies.

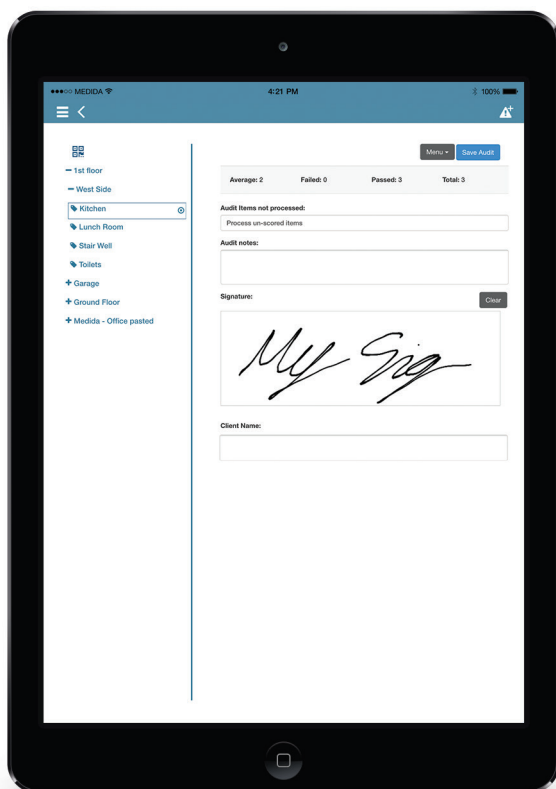

If you have a business with on-site employees, then Audit Cloud could not only save your company time and money, but give consistency and flexibility to both your customers and your internal processes.

Audit Cloud is an App driven piece of software that automates the auditing process. It not only works for employees on site helping guide them through their tasks, but because it is cloud based, it fully synchronizes with any other staff or offices you wish it to.

Unlike some of the off-the-shelf systems you can buy, Audit Cloud is designed to be bespoke to your company.

Having a system that works offline is important.

Having a system that works offline is important too. If you have no connection, no problem. Audit Cloud will store all the information recorded in a job locally on a tablet (or phone) and synchronize all the data when you next have a connection.

Some of the features include:

- Checklists
- Comments
- Uploading of photos
- Signatures
- Quality scoring system
- Barcode or QR scanning
- Flag raising
- Emails & SMS directly from the App
- GPS location services

(all available on IOS, Android)

The benefits of Audit Cloud

- Save time and money on paperwork and administration
- Records information in a clear and professional manner
- Clear overview of your facilities management activities across multiple locations and devices
- Identify faults, record photos and descriptive logs ensuring quality - then activate workflows
- Send emails from Audit Cloud relating to specific jobs
- Record data locally, then sync through a cloud based set-up
- Bespoke configuration
- Document with bar-code scanning or QR codes
- All data securely backed up and encrypted

The benefits of Audit Cloud

- Real-time updates for all users
- Once a job is carried out, it can create a downloadable PDF. If there are any 'fails' in the work that has been audited, Audit Cloud will kick off a work-flow event for that job. The specific tasks can be sent to specified users and it will even chase them to ensure it is done!

*If you'd like to try our system for free, simply email john@medidasoftware.co.uk and we will provide you with a **no obligation** test account to try out.*
